

Dragon Egg Instructions

Adults & Crafts

Waterloo Public Library

Instructions:

Starting at the base of the egg, start placing in your thumbtacks. Layer each thumbtack so you don't see the Styrofoam underneath.

TIP: I suggest dipping the thumbtack in modge podge or tacky glue to help secure them so they don't fall out over time, or spray them with a varnish at the end (if you spray them make sure ALL Styrofoam is covered because the spray will melt it)

Keep going until you've covered the whole egg.
